Mirror

P.O. Box 15

POST OFFICE WILL MOVE

A change in the location of the Mirror post office will be made shortly, as Postmaster James MacKirdy has bought two lots from the village for a new site. The lots are numbered four and five in block 25, just east of the new telephone building and the town hall. He has also bought the building north of The Journal office (the Len Jos building) and will move it on to the Lake street lots. The work of levelling the lots will proceed at once and a small-sized cellar will also be dug.

A number of alterations will be made in the building, and sufficient room will be left in the front part for the comfort of the public. An addition 22x14 will be made to the rear of the building, which is 25x18, and this addition will provide a part of the living quarters for Mr. and Mrs. MacKirdy.

The exterior will be finished with cement stucco.

Short Session Of Council

The regular meeting of the village council was held in the secretary's office, Monday evening, September 11th, 1922, at 8 o'clock. Present, Messrs. Spiece and Hazell.

The minutes of the previous meeting were read and approved.

The following accounts were presented:

Telephone.....	\$ 5.00
H. J. Gault, auditing.....	16.00
A. J. Jewell.....	10.00
Postmaster, box rent.....	6.00
Cleaning hall.....	1.00
Devereaux Drug Co.....	1.00

Spiece—Hazell: That accounts be paid.

Spiece—Hazell: That application of Jas. MacKirdy for lots 4 and 5, in block 25, at \$25.00 each, be accepted.

Hazell—Spiece: That the village taxes for 1922 be rebated to Mrs. E. Hutchinson and Mrs. Theo. Pederson.

A letter from the attorney general's department re Hugh Steele was read.

Tuxis Boys, Notice!

All the Tuxis boys, and all boys from the Rangers of last year, entitled now by age to become Tuxis, are requested to meet the pastor in the Union church on Friday evening, Sept. 15th, at 9 o'clock, to reorganize for the coming fall winter term.

LOCAL AND DISTRICT NEWS

Lorne Vowels, of Ross Lake, Idaho, is paying a short visit in the district.

Mr. and Mrs. Geo. H. Smythe, of Bashaw, Sunday at the home of Mr. and Mrs. J. Steele.

Attend the dance in the Grand theatre on Friday evening, September 15th. Music by Bullock's orchestra.

The Security Elevator received the first load of grain last week, Henry Carr bringing in wheat that graded No. 2.

Mrs. L. Hayes and son Jack, who were the guests of Mr. and Mrs. Jas. MacKirdy for a month returned to Calgary last week.

G. E. Bartlett, teller in the local branch of the Royal Bank, has resigned his position and will leave in a month's time for Chicago. He contemplates a trip later to the Argentine.

The general meeting of the Women's Auxiliary of St. Monica's Church will be held at the Rectory on Thursday, September 21st. All members are requested to be in attendance at 2:30 sharp.

Archibald McNair was called to Winnipeg last Saturday on account of the serious illness of his mother, who underwent a successful operation on Monday.

W. McNair, of Bashaw, accompanied his brother, Mrs. Clifford T. Steele and her daughter Marie, of Sledge Creek, Alta., are visiting at the home of Mr. and Mrs. James Steele. They leave shortly for Winnipeg, where they expect to stay for the winter months.

J. A. Gaudin, of Stettler, was a visitor at the home of his daughter, Mrs. Nelson J. Devereaux, on Wednesday evening. Mr. Gaudin was on his way home from Rocky Mountain House, where he acted as judge of the horses at the fair.

The program committee of the Trail Rangers met at the parsonage on Tuesday evening last and drew up an agenda of work for the next two months. The committee were as follows: Hugh Smith, Jack Amesley, Art Ballantyne and Rev. J. E. Collins.

TEA "is good tea"

Be A True Sportsman

The shooting season in Canada's Western Province is at hand and young and experienced sportsmen will find with seasoned old hunters in taking toll of wild duck, prairie chicken, geese and blager game. In many respects the West constitutes the amateur hunter's paradise. In other Provinces, it is a very great extent. It is necessary for sportsmen to travel far afield from home to enjoy the hunting season, but in the Prairie West wild ducks are to be found on almost every pond, slough and lake, while prairie chicken feed about the stumps of grain and roost in the little wooded bluffs which dot the farm homesteads.

These game birds are one of the assets of our Canadian West, and an asset worth protecting. Apart altogether from the sport of hunting, these birds have a high food value and are a delicious much enjoyed by all. During the close seasons their presence adds to the picturesque of Western life and call forth expressions of interest and delight from permanent residents, visitors and tourists.

It is in the interests of all, therefore, but perhaps more particularly in the interests of the sportsmen themselves, that restraint should be exercised by all hunters at the opening of, and throughout the shooting season. Laws have been enacted restricting the period of the "open season," limiting the size of the daily and seasonal "bags," and imposing penalties for infractions of these ordinances. Violations of these laws are, however, not always easy of detection, but it should be a part of every true sportsman's code that he observe these laws which have been enacted for his own and the public good, and that he should actively interest himself in seeing that such laws are obeyed by others, and offenders brought to book.

Outliners can recall when the buffalo ranged over these prairies in countless thousands; so numerous in fact that any thought of the possibility of their extermination never entered the mind of anyone. Yet a comparatively few years of wanton slaughter and the buffalo disappeared and is only to be seen today in zoological gardens and in specially preserved Government reserves. In like manner the industrious little beaver, Canada's national animal, was in danger of extermination until the killing of beaver act was passed, and all times was prohibited.

A report recently issued by the British Columbia Government states that the famous Fraser River, the greatest river in the world for years in its stead of sockeye salmon, whose waters only a decade ago were crowded with swimming seasons of the year that a person could literally walk across a solid mass of fish, is now fished out of sockeye, and that the Skeena River, for decades second only to the Fraser in its salmon production, has practically reached the same condition. And the salmon industry was not so long ago one of British Columbia's greatest industries, and one which advertised that Province all over the world. The men who have been responsible for this annihilating the salmon in a burr-pot get rich quick scheme have ruined not only their own business but have inflicted irreparable loss on their Province and Dominion.

There should be an object lesson in these things, the force of which need not be lost upon every man who takes out a hunter's license in the Western Provinces this year. Some men may think it smart and an evidence of great skill and manhood to bring down an unusually large number of birds, and to boast of their achievement, but it is something over which they should hang their heads in shame, rather than boast about it.

Shooting for the mere sake of shooting is not sport, and the man who indulges in such a practice is not a true sportsman. And most assuredly he is not the friend of sportsmen, because sooner or later the inevitable result will be to deprive everybody of a legitimate means of sport, and to rob the country of what has always been described as a very valuable asset.

Game guardians should be accorded every possible support by all true sportsmen and lovers of wild life. Instead of assisting offenders against our game laws to escape detection and the just penalty for their infractions of the law, people generally should cooperate to expose these lawless ones and bring them to justice.

The West can ill afford to have our game birds go the way of the buffalo, the beaver and the moose. It is a serious oversight of existing game laws to sportsmen, and the exposure of the few who consider their momentary pleasure to the rights and interests of others and who by their acts jeopardize the future, will assure to the Western Provinces an ever-continuing pleasure and guarantee a retention of one of the picturesque features of the country—the wild bird life.

Johnnie's Game
Jimmy—Mother, I play at making believe I'm entertaining another little boy?
Mother—"Oh, dear, of course."
Jimmy—"Well, you give me a piece of cake for him, please?"

Call Her? Oh, No!
Misses—What is your name?
Miss—Miss Jenkins.
Misses—But you don't expect me to call you Miss Jenkins.
Miss—Oh, no; not if you've got an alarm clock.

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

BAYER Genuine

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Earache Lumbago Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade-mark registered in Canada by Bayer Manufacturers of Monachweier, Germany. It is well known that Aspirin is a Bayer product. The Bayer Company will be engaged with their general trade mark, the "Bayer Cross."

Coaching Through London

Enthusiasts Pay for Privilege of Handling Ribbons

One of the most interesting sights of London to most visitors is the fine coach-and-four which every morning makes its way along Piccadilly and so on to the high road, with a load of happy passengers for Hampton Court—three "four" men. But few people who see the coach and listen entranced to the guard's cheery blarney on his posthorn—few Londoners even—know that the vehicle is driven each day by a different man of means, a coaching enthusiast, who pays so much towards the maintenance of the service for the privilege of being allowed to handle the ribbons. It is quaint things like this—and there are many of them—that make London so fascinating, alike to the visitor and the man who "belongs"—Overseas Daily Mail.

A CORDIAL INVITATION TO DISEASE

This is an apt description of Constipation. It's an unnatural condition—but it's dangerous, too, because, if left to indigestion, fills the system with poisons, brings on anemia. You don't need a medicine, you don't want to weaken the system by a harsh purgative—what you need is mild natural stimulation to the bowels. You get just what you need in Dr. Hamilton's Pills which tone up the liver, restore the bowels to normal action, soothe the entire system. You'll feel right after taking a box of Dr. Hamilton's Pills. Good for young and old—real family medicine. 25c all dealers or The Cuthbertson Co., Montreal.

Britain Scraps Six Ships

In accordance with the Washington naval agreement the Admiralty has ordered six large capital ships scrapped. They are the battle cruisers Lion and Princess Royal, and the battleships Orion, Monarch, Conqueror, and Erin, all among the most famous warships in the British navy.

A GENTLE LAXATIVE FOR THE CHILDREN

Mother—the sure way of keeping your little ones well and happy—whether it is the new-born babe or the growing child—is to keep their bowels regular and their stomach sweet. Constipation in children is almost always the result of clogged bowels and the best medicine for sweetening the stomach and promoting rest and natural sleep. *Filed a medicine is Baby's Own Tablets.* They are a gentle but efficient laxative, are absolutely free of any danger from opium or other injurious drugs and may be given to the youngest infant with perfect safety. They banish constipation and indigestion, break up colds and simple fever, and ease the baby that health and happiness which all children should have. They are sold by medicine dealers or by mail at 25c a box. Write to Dr. Williams' Medicine Co., Brockville, Ont.

Japanese Excess in Brains

The brains of the Japanese, both male and female, show a greater weight than those of the Americans, and English.

Why suffer from corns when they can be painlessly removed by using Holloway's Corn Remover.

Restore War Devastated Regions

Reported Hugo Stinnes Will Enter Pact With French Interests

Industrial leaders of Berlin, who are distressed by being well-informed as regards the plans of Hugo Stinnes, Germany's leading industrialist, predict the early conclusion of a pact between Herr Stinnes and a group of French interests, represented by the Marquis de Lubersac, which will have for its object the scientific working out of a plan for the restoration of the war-devastated areas.

The negotiations, which have been going on virtually over the heads of the German and French Governments, will make it possible for local co-operation and larger units in the former French zone to contract direct with the Franco-German syndicate for building and other materials, which will be delivered chiefly by Germany.

Big Fox Ranch For Minneapolis

Orchestration of a \$5,000,000 silver fox ranching and fur marketing company has been completed in Minneapolis, Minn. The company plans on having several thousand pairs of Prince Edward Island foxes on its ranches in a few years.

Ruled Out

Any kind of financial theorist can get a hearing in America, except one who insists on the old ideas of hard work, thrift and well-protected credit.—From the Kansas City Star.

The building of the St. Paul Canal began in 1869 and required 19 years.

OIL LIGHT BEATS ELECTRIC OR GAS

BURNS 94% AIR

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U.S. Government at 25 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe and 94 per cent. oil and 6 per cent. common kerosene (coal-oil).

The inventor, T. J. Johnson, 579 McDermott Ave., Winnipeg, is offering to send a lamp on 10 days PRIZE trial, or even to give one FREE to the first user in each locality who will help him to give it a trial. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$120 to \$500 per month.

A Costume That Any Miss Would Adore

Executions In Russia

1,768,116 Persons Said to Have Been Executed Under the Bolsheviks

A Hiss Dispatch to the London Times says that according to official Bolshevik figures, the Cheka executed 1,768,116 persons before being renamed the supreme political administration, last February.

The total includes 6755 professors and teachers, 8,890 doctors, 23,250 other intellectuals, 1,213 priests, 24,650 officers, 200,000 soldiers, 50,000 policemen, 12,500 land owners, 19,250 workmen, 31,160 peasants.

During the civil war the Bolsheviks having had more killed than all Russia during the great war.

The Druggists All Agree That "Putnam's" Is Best

The oldest corn remover on the market is Putnam's Corn Extractor, and it is the best. Your corns will all drop out after a few treatments with this painless remedy. Failure impossible. Refuse a substitute for "Putnam's." 25c everywhere.

India has perhaps a greater variety of plants than any other country in the world, having 1,200 native species, or about 50 per cent. more than is embraced in the flora of the whole of Europe.

A consignment of ostrich skins for shoe leather recently arrived in Boston. It is claimed they will outwear leather footwear and cost less.

The Mad Motorist

Just Penalty for the Man Who Endangers Human Life

One thing is certain, the motorist who goes careening through the streets, without regard for the life and limb of pedestrians, or who endangers his car while under the influence of liquor, is as much a menace to the community as a mad dog and deserves no more consideration. In addition to other penalties imposed, persons found guilty of these grave violations should be deprived forever of the privilege of driving automobiles. If a cashier embelizes his employer's money he is not usually again to be trusted with the handling of funds. Why trust with potential engines of death those who have shown them selves unfit?—Detroit Free Press.

A TWO-FOLD DUTY

Many thoughtful mothers first give their children

Scott's Emulsion

regularly—and then take it themselves. It is a tonic-food that contains elements as useful to an adult as to a child, and gives you strength—try Scott's.

Scott & Bower, Toronto, Ont. 19-4

All For His Children

This Man Might Be Able to Settle Germany's War Debt

A writer in a German newspaper has been estimating the fortune of that mystery magnate, Hugo Stinnes. Before the war it was reported that his private wealth amounted to \$155,000,000—gold marks, of course. His fortune today is more difficult to estimate because it is scattered over many companies in numerous countries. But financial circles, who study these things with much interest, say that he is now worth \$140,000,000—gold. He has therefore quadrupled his wealth during the war and since. In paper, that fortune equals the size of \$17,000,000,000, so that Hugo Stinnes Jr., a millionaire in paper marks 7 1/2 times over. Asked recently why he worked night and day piling up millions, he remarked: "It is for my children." He has two sons, and a daughter.—Montreal Gazette.

A Power of its Own—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been priced as the leading liniment for man and beast.

A Duck's Speed

The speed of which a duck can fly is much greater than the average person would suppose. For instance, it has been estimated by a competent authority that the speed of the canvas back is ninety-eight miles per hour; that of the blue-winged teal duck, thirty-nine miles; and that of the Canada goose, seventy-six miles. These speeds are probably in excess of their average flights, however.

WOMAN COULD NOT WORK

Made Strong and Well by Lydia E. Pinkham's Vegetable Compound

St. Paul, Minn.—"I took Lydia E. Pinkham's Vegetable Compound for a tired, worn-out feeling, and it did me so much good. I used to get up with a pain in my head and pains in my arms and back. After I took Lydia E. Pinkham's Vegetable Compound, I have taken it. I feel like a new woman."

It can do every bit of my work and it's the best thing I have found to compound your medicine and you can use it for a long time. I have taken it. I feel like a new woman."

Lydia E. Pinkham's Vegetable Compound is a Woman's Medicine for Women's Ailments. Always reliable.

Practice Is Condemned Of Handing Out Doles In Unemployment Cases

Ottawa.—Condemning the practice of handing out unemployment doles, declaring that the peak of unemployment is now passed, and that additional money for doles will be unnecessary, and enunciating the principle "that the problem of unemployment is primarily one of industry, and that every effort should be made in the industry to prevent the occurrence of unemployment," the national conference on unemployment came to a close here.

Hon. James M. Macdonald, Minister of Labor, handed out two resolutions which had been passed unanimously by the conference. He was asked specifically with regard to the attitude of the conference on doles.

"The conference," he said, expressed the opinion that the practice of handing out doles is wrong in principle and often harmful in effect, and should not be resorted to until all other measures have failed."

The first resolution handed to the press by Mr. Macdonald, which, he said, had received the unanimous approval of the conference, is as follows: "In connection with the attention which has been given by this conference to the problem of unemployment and the measures which may be deemed necessary by the public authorities in Canada to provide for the relief of unemployed persons, the conference hereby places on record, as an expression of its views, that the problem of unemployment is primarily one of industry and that every effort should be made in industry to prevent the occurrence of unemployment."

"It is recognized that the occurrence of unemployment in some cases may be outside of particular industries and in part due to causes which are international. This conference, however, urges upon those engaged in industry the necessity of regulating employment in the interests alike of employer and employee."

The second resolution, moved by Hon. R. E. Finn and seconded by Hon. C. W. Robinson, also received the unanimous endorsement of the conference. It follows:

"Whereas, in the departments of Government, both Federal and local, there are agencies upon which employment is dependent, and whereas the Canadian National Railroad Board is the manager and operator of the Canadian National Railway and the Canadian Government system, and whereas they are boards administering under legislative authority, special department of public works in the various provinces; and, whereas, there are recurring periods of unemployment; therefore, this conference recommends that the respective Governments, the National Railway Board and the board administering the special department of public works in the various provinces, should regulate and carry on their public work and public operations so as to distribute the work in such a manner as to relieve unemployment to the greatest possible extent throughout Canada."

On the question of unemployment relief, Mr. Macdonald said that the view was expressed by representatives that the peak of unemployment had passed. The hope was further expressed, he said, that there would be no unemployment necessitating Government assistance. If there should be such unemployment, the view of the conference was that no additional means, other than those

World Wheat Crop Smaller

Washington.—The world's wheat production, for the year ending last year, but considerably greater than the pre-war average, according to estimates made public by the United States Department of Agriculture. Estimates and condition reports from reporting centres indicate a yield this year of 3,015,529,000 bushels, compared with the production last year of 3,059,596,000 and the 1909-12 average of 2,890,255,000 bushels. Reports from all sources regarding Russia, said crop conditions were favorable and would feed the nation this year, eliminating the need of imported wheat.

which had been taken in the past, would be necessary to deal with it. It was stated that there had been unanimity on all the points mentioned. The unemployment situation was thoroughly canvassed and the difficulties of the various provinces discussed.

France May Utilize German Materials

Paris.—An agreement for the restoration of France's war-damaged railways came up for consideration before the Special Governmental Committee of the League of Nations.

Mr. Stewart stated that there was a favorable attitude in the Southern Alberta, country by powerful and legitimate companies. Development, caused in a great measure by the success immediately after the war. Across the international border, daily 400 outfits are at work and on the Canadian side drilling is already in full blast. It will be carried out, this branch of the Mines Department, is on the ground watching development.

Farmers May Shoot Ducks Out of Season

Saskatoon.—Government issues Order for Protection of Crops Regina, Sask.—An order-in-council has been issued by the Provincial Government, allowing for farmers to shoot, out of season, wild ducks which are damaging grain crops.

Many reports have been received from districts where the birds are causing much havoc in the grain fields and at Duval, Sask., they are causing considerable damage. The order of two boys employed for the sole purpose of driving them off proved unavailing.

Amundsen's Air Pilot Retires Vancouver.—Lieut. E. G. Pulterton, RCAF, returning from the Canadian air staff here, who was to have piloted Captain Amundsen's monoplane from Vancouver to St. Lawrence, and back from Alaska. Captain Amundsen will make the flight with one pilot only.

Wood Alcohol Poisoning New York.—The deaths of three men and two women and a case of blindness have occurred in the Red Hook section of Brooklyn, which police attribute to wood alcohol poisoning.

Predicts Revolution In Greece As Result Of Turkish Army Successes

Rome.—A dispatch to the Giornale d'Italia from Smyrna reports that the city has been closed to exclude the hordes of refugees in flight before the Turkish Nationalist army. British subjects are leaving aboard a British ship, and the families of Greek officials and officers are departing. French and Italian troops have been hoisted over many houses to indicate that they are under the protection of those countries.

The dispatch adds that reports from Athens predict a revolution in Greece and the return of former Premier Venizelos to power. The advice says that Mustafa Kemal Pasha is personally directing the advance of the Turks against the Greeks and has shown extraordinary gifts of strategy and military tactics. Considerable feeling was caused

here by the report that two Italian soldiers, returned from Constantinople, had been attacked by Greeks at Pireas, one being killed and the other wounded. Following the attack, the Greek premier visited the Italian legation and expressed regret. He assured the minister the men who attacked the Italians would be punished and the families of the victims compensated.

London.—The Times learns that King Constantine has left Athens. No suggestion is made as to where he has gone, or why.

While the Turks are hastening to press their advantage over the Greeks in their advance towards Smyrna, the latter are rushing reinforcements to the scene and General Trikoupi can restore the morale of his men, the Kemalists may yet be brought to a standstill. It is believed here.

NEED AGGRESSIVE IMMIGRATION POLICY

CAPITAL FOR DEVELOPMENT OF WEST IS FORTHCOMING

Ottawa.—"Immigration and development of our natural resources are essential to the progress of Canada and to the solution of many national problems," declared Hon. Charles Stewart, Minister of the Interior, in discussing his recent western tour. That a national and aggressive immigration policy has been developed and will shortly be announced, is now definitely known.

"Capital is required for development, especially in Western Canada, where the great natural resources are abundant," Mr. Stewart added. "The Government is prepared to encourage investment for development, but not for exploitation or stock mongering. Every year Canada sends out of the country \$400,000,000 for petroleum and other resources. Alberta, in the near future, furnish a home product that may check in some degree this drain on our capital. The development of the United States oil field north has brought production within the international boundary, and it is confidently anticipated that discoveries will bring this side of the line that will bring activity and prosperity to our western development. The same is true of other natural resources in the west."

The Government is prepared to protect and encourage legitimate investment in development and to discourage stock jobbing tricks. Lease conditions will be carried out, this letter by the Government and investor need not fear retroactive legislation imposing unexpected conditions or exactions. Successful development will repay the Government under present conditions and in the property that follows in its wake."

Mr. Stewart stated that there was a favorable attitude in the Southern Alberta, country by powerful and legitimate companies. Development, caused in a great measure by the success immediately after the war. Across the international border, daily 400 outfits are at work and on the Canadian side drilling is already in full blast. It will be carried out, this branch of the Mines Department, is on the ground watching development.

Expect Italian Immigrants

Huge Colonization Scheme Is Now Under Way

Montreal.—A huge colonization scheme to settle Italian immigrants in Canada is projected by the Government of Italy, which has sent Joseph De Micheli, General Commissioner of Immigration, to the provinces to survey industrial and agricultural conditions in the Dominion, with a view to ascertaining the quota and the type of immigrant most needed here.

Mr. De Micheli passed through Montreal en route to Ottawa, where he will meet members of the Cabinet and confer with the heads of all departments of labor and immigration.

Following these meetings he will cover each of the provinces from Ontario westward, accompanied by Jules Boissard, Italian Consul to Canada. When Mr. De Micheli completes the survey in Canada he will make a similar tour of the United States.

In explaining his mission, Mr. De Micheli declared it had three chief reasons: First, to ascertain the class of immigration most needed by the Dominion which Italy could supply; second, to secure Canadian capital which would be joined to Italian capital with the view of establishing Italian farmers on Canadian land; and third, to collect first-hand data on actual conditions in the Dominion, and to determine whether it was feasible for the Italian Government to embark upon the contemplated colonization scheme.

Sentenced to Death For Counter-Revolution

Russian Newspaper Announces Conviction

Moscow.—Fifty-five persons have been sentenced to death in South Russia upon conviction of counter-revolutionary activities. The newspaper Pravda announced. The Ukrainian Court at Kiev sentenced 41 members of Petrich's Cossack bands which, in connection with General Tsalik's forces, arose against the Ukrainian Government. All the convicted persons appeared.

At Simferopol, Nicolai Dzenko, a young officer who, under an assumed name, proclaimed himself the Czar of Russia several months ago, was sentenced to death, together with six followers, while M. Dzenko and seven others were sentenced to prison.

German Payroll Shows Increase

Civil Service Employees Get Thirty Per Cent. Raise

Berlin.—Germany's civil service payroll for September will show an increase of one hundred billion marks over August in consequence of negotiations between officials and employees. A 30 per cent. raise in wages was decided upon, due to the increased cost of living.

The index figure on the cost of living throughout Germany rose 40.3 per cent. in August as compared with 32 per cent. in July.

Soliciting Funds For Irish Republican Cause

Widow of Mayor McElwee in States to Raise Money

New York.—Mrs. Muriel McElwee, widow of former Mayor Torrance McElwee of Cork, who died of starvation in British Prison, London, in 1920, arrived on the President Arthur. She was accompanied by Linda Mary Kearns, Irish republican, and said the purpose of her visit was to raise funds for the dependents and orphans of the Irish republican cause, and for hospitals of the wounded Irish republican army.

British Coal For Boston

Boston.—British coal is pouring into Boston in such quantities that 14 laden vessels are riding in the lower harbor awaiting opportunity to discharge their cargoes, while two others are in the upper harbor. Their loads total 84,000 tons. Nearly one-quarter of a million tons have arrived in this port since the first shipment following the American miners' strike. Thirty-six steamers are en route from British ports for Boston, carrying upwards of 200,000 tons.

IT COULD BE WORSE.

Parliament To Consider Extension Of Franchise To Natives Of India

U.S. Dollar At Discount In Canada

Montreal.—The United States dollar is being quoted at a discount of one-quarter of one per cent. here. This is the first time in seven years the United States dollar has sold for less than par here. It is said in financial circles that on a very large amount, say \$200,000, one-half of one per cent. discount will be demanded here. Various reasons are offered as the cause of the discount, but the one which is most justifiable, according to banking officials and financiers, is general prosperity in Canada. It was thought that the market had been over-erred and the American dollar forced below par, but this is refuted by exchange brokers as being an impossibility owing to the strength of the American banks. It is also said the new American tariff might have had something to do with the exchange.

RUSSIA CONFIDENT OF PEACE IN FAR EAST

OUTCOME OF CONFERENCE WITH JAPAN IS CONSIDERED HOPEFUL

Moscow.—Russian State officials appear extremely confident that the conference with the Japanese at Chang Chung will bring peace to the Far East and re-assertion of Russia's sphere of influence in Vladivostok. The railway administration is understood to be preparing to restore service on the European Asia route with direct through trains from Moscow to Vladivostok while the news papers announced the formation of a United company to operate the line from Petrograd to the eastern city.

Already Russian trains de luxe are operating across the Far East since Moscow now for the first time since 1905, has been able to send a mail train all the way across to the Pacific.

Fatal Mining Accident Pernie, B.C.—Dan Bodak is dead and George McDermott slightly injured, following a cave-in at No. One Coal Mine at Coal Creek. Bodak, an unmarried Russian, was hit by a boom when the slide occurred. He was rescued with a few minutes, but died later of injuries. McDermott also was buried by the cave-in, but his injuries are negligible.

Bennett Balloon Race

Geneva.—Lieut. Ernest de Myster, of Belgium, was officially declared the winner of the recent international balloon race for the James Gordon Bennett cup. Captain H. E. Honeywell, one of the American entrants, was ranked second, and Maurice Helineau, French entry, was ranked third.

Railway Employees May Fight Award In Recent Wage Dispute

Ottawa.—Before the matter could be discussed and decided upon by the Executive Committee, Charles Dickie, Secretary of Division No. 4, Railway

Ottawa.—Parliament is to be invited to consider the extension of the Dominion franchise to natives of India resident in Canada.

A few days ago Right Hon. Sir John Dillwyn Davies, the Prime Minister and members of the Government to urge the enfranchisement of his fellow-countrymen now in Canada. The interview took place in private, but reports have since been current that the Prime Minister had refused the request made by Mr. Dillwyn Davies. Referred by a Canadian Press representative to these reports, Premier Mackenzie King issued a copy of a letter he had written to Mr. Dillwyn Davies on the subject.

Mr. King's letter, which is dated September 5, reads:

"In reply to the representations made by you at the interview with me on September 3, I am sorry to hear of last week, and which were the subject of further conference between us, I desire to assure you that, at the earliest favorable moment, the Government will be pleased to invite the consideration of Parliament to your proposal, and myself on Friday, in Canada be granted a Dominion parliamentary franchise on terms and conditions identical with those which govern the exercise of the right by Canadian citizens generally."

"The subject is necessarily one which Parliament alone can determine. It will be submitted to Parliament for consideration when the franchise law is under revision."

Mr. Mackenzie King, the Government of India, an expression of the attitude of the Government of Canada in this matter, we hope that you will not fail to make it clear, that, at the present time, in light of the nine provinces of which our Dominion is composed, the Federal franchise is granted to natives of India resident in Canada on terms which are identical with those which govern generally Canadian citizens."

Agree to Offer Loan to Austria

Mortuaries of Five Years Asked by London Bankers

London.—A group of London bankers have agreed to offer Austria a loan of between 200,000,000 and 300,000,000 krona according to the Daily Express. The loan, which will require the approval of the Reparations Commission, would be secured by Austria's industrial resources, and is granted only on condition that Austria be given a moratorium of five years on her war indemnity payments.

Big Apple Crop

Ottawa.—The commercial production of apples in Canada, in 1921, was officially declared to be 1,228,619, according to information collected by the Dominion Bureau of Statistics. The value of the commercial production of apples was \$2,402,410 barrels, valued at \$29,612,119.

Railway Employees May Fight Award In Recent Wage Dispute

Employees' Union, Montreal, sent a telegram to Hon. James Macdonald, Minister of Labor, protesting against the Government accepting the majority award of the Board of Conciliation adjudicating the dispute between the 25,000 railway shoguns and the members of the Railway Association of Canada. The telegram pointed out that the award was not a settlement of the trouble, and demanded that the case be reopened.

Toronto.—James Simpson, a member of the Board of Conciliation, whose other two members are Alex. Smith, Chairman, and Isaac Pihladi, K.C., representing the railroads, recommended tentative wage reduction to shop workers of seven and nine cents an hour, between the 30,000 affected employees will fight the majority award.

Mr. Simpson submitted a minority award, which pointed out that this board did not properly inquire into the wage reduction. "On the ground that the principal issue was not dealt with by the board, I feel I can express the opinion that the affected workers will fight the ruling," said Mr. Simpson, although he was not prepared to say the feeling of the men would lead to a strike.

New Standards For Potatoes

Summary of Recent Legislation Enacted by Federal Government

The following summary of the recent legislation enacted by the Federal Government establishing standards for root vegetables, has been prepared by the Cyclopedia and Market Branch of the Saskatchewan Department of Agriculture.

Hitherto growers could, if they desired, sell their potatoes under the grades known as No. 1 and No. 2, but the new Food and Drug Act, in addition to potatoes, has now included sweet potatoes, yams and yam-like tubers, and also includes an additional standard in potatoes to be known as the Canada grade, which is really standard because the section reads that it shall only include potatoes of one and one-half inches or more in diameter.

Section 2, Subsection 1, of the Act reads as follows:

(1) The following shall be the grades for potatoes offered for sale in Canada—

(a) Canada A quality, which shall include only sound, reasonably mature potatoes of similar varied characteristics, which are practically free from rot or other foreign matter, such as injury, sunburn, abnormal growth, green cracks, cuts, scabs, blight, soil, dry rot or damage caused by disease, insects or other mechanical means. In this grade the diameter of potatoes of the round varieties shall not be less than one and seven-eighths inches, and of potatoes of the long varieties one and three-fourths inches.

(b) Canada B quality, which shall include only reasonably mature potatoes of similar varied characteristics, which are practically free from rot or other foreign matter, such as injury and soil, and which are free from serious damage caused by sunburn, cuts, scabs, blight, dry rot or other disease, insects, or mechanical or other means. The diameter of potatoes of this grade shall not be less than one and one-half inches.

In order to allow for variations incident to commercial grading and handling in each of the grades five per cent, by weight of any lot may be under prescribed size, and in addition five per cent, by weight of any lot may be below the remaining requirements of this grade, but not more than one-third of such size and weight. That is to say, not more than two per cent, by weight of the entire lot may be below the required size.

(c) Canada C quality shall include only potatoes of one and one-half inches or more in diameter. The Act does not apply to new potatoes when shipped between the first day of June and the thirtieth day of September, nor to seed potatoes.

Commencing early in September the Markets Branch of the Saskatchewan Department of Agriculture will begin the plan to put into force last year will after inspection of the potatoes, hand the growers a written report which should be forwarded to the Markets Branch. Early applications must be made for an inspection as growers have to be grouped into districts to be inspected as a unit.

The service is free. Persons wishing to list their potatoes with this branch should do so at once, as the Markets Branch will then mail a weekly list to the wholesalers.

A farmers' organization shipping potatoes by the carload will be notified by the Markets Branch as to the prices to be paid and ship according to the grades designated in the Root Vegetables Act. Definitions of the grades are very plain and easy to follow, and there should be no difficulty in grading the potatoes to them.

Alberta Leads

Final returns on the Canadian census taken last year have been published and show that Alberta led all other provinces in increase in population since the census of 1911, the increase being 57 per cent. The increase for the whole of Canada is given as 57.83 per cent. This is an increase of 21,955 per cent. Since 1911. The increase for the whole of Canada is given as 57.83 per cent. This is an increase of 21,955 per cent. Since 1911. The increase for the whole of Canada is given as 57.83 per cent. This is an increase of 21,955 per cent. Since 1911.

Calgary Triumphs

Calgary's reputation as the leading telephone city on the North American continent, with one instrument in use for every 4.18 persons, was well justified this year, according to C. E. Eassey, who is in charge of the production of the new telephone directory. The circulation of the telephone directories in Calgary is approximately 12,000, and this year shows an increase of about 2,000.

Per Capita Production

On the basis of the recently published census figures, the per capita production amounts annually to approximately \$400 for every man, woman and child in the Dominion.

Saving Livestock

Report Shows Few Animals in Saskatchewan Lost From Infectious Disease

"Comparative few animals have been lost through infectious diseases throughout the past year," states Dr. J. S. Fulton in his report to the Livestock Branch of the Saskatchewan Department of Agriculture, "a fact perhaps due to the continued use of vaccines for the diseases which have been so prevalent in the province for the past few years. The diseases to which I refer are hemorrhagic septicaemia and blackleg. Dr. Fulton is the veterinary in charge of the laboratory at the University of Saskatchewan, dealing with the diseases of animals."

The chief routine work of the laboratory consists of examining blood samples taken from animals which have died from a disease which could not be properly diagnosed by the clinical symptoms. When such a sample arrives, it is immediately examined, and if the findings point to an infectious disease, the vendor is notified by the return of the carcass that it is not advisable to use any part of it for human food.

Some live tests of cows for infectious abortion were made during the year. This test requires a small sample of blood from the animal tested to be sent to the laboratory. Investigation work was continued in connection with infectious fever in horses, but the number of cases of this disease has been very small. This disease has often been considered the same as swamp fever, but the work of the laboratory has shown that the two diseases are quite different and distinct.

"During the early spring," says Dr. Fulton, "many of our cattle were lost which were supposed to have suffered from an infectious disease. Upon investigation, however, they were found to be dying from the effects of insufficient or unsuitable feed, brought about by the unforeseen duration of the winter. It was seen that in some cases the owners failed to satisfy the owner that care was being taken of the animals, and the trouble. It must be accepted that straw and water is not a suitable feed for cattle during the winter, and the sooner proper feed is secured and fed during the winter, the sooner will our herds be free from the two apparently mysterious diseases, mal-nutrition and starvation."

World Fliers Had Narrow Escape

Rescued Fifty Hours After Airplane Fell Into Sea

Capt. Norman McMillan, of the London Daily News, a vivid account of the experiences of himself and Lieut. Studdard after their airplane crashed into the sea in their attempt to continue the projected flight around the world, started by Major Blane and his admirals aboard the battleship. The airman were blown down by engine trouble and suffered so much from exposure that they were sent to a hospital when rescued. For fifty hours they drifted alone in the shark infested waters and their despair was complete when a native big passed them in the evident belief that they were evil spirits. The naval launch which finally rescued them was on the point of putting ashore the airman were native boys.

"Good thing I had another look at you," said the commander of the launch when they were safely aboard.

New Market for Canadian Cattle

Representatives of the Dominion Department of Agriculture are en route to Seattle, America, to investigate opportunities for establishing a market for purebred Canadian cattle in the Argentine Republic, Brazil and Uruguay. As the latter two countries are recognized by livestock authorities as likely to be among the important sources of the world's meat supply, a special study of the methods employed in breeding, feeding and restocking purebred cattle will be undertaken.

Unusual Exhibition in London

Spectacle of Deep Sea Fishing Proved Fascinating

Official exhibitions are not much appeal for juveniles as a rule, but the fish market in London a Deep Sea Fishing Exhibition which has proved a notable exception. Small boys have simply swarmed there, lured by the fascinating spectacle of live fish in tanks. The dealer in fish at work, dealers in full kit going about their strange business, and last—but possibly not least—the preparation of fish lunches. Incidentally, if they were in a mood to absorb mathematics, they might have learnt that approximately one million pounds of fish are taken in the British Isles each year, and that a hundredweight of fish provides 150 wholesome meals, and that before the war our fishermen caught annually enough fish to furnish 2,000,000,000 square meals of London Times.

The number of millions in a caterpillar are over 1,000.

"I HEAR THEY WANT MORE!" Daily Express (London)

An International Event

Airplanes Carrying 100 Passengers Invited to Race Around World

Great Britain has received an invitation to take part in a race around the world with hydro-aeroplanes capable of carrying not fewer than one hundred passengers. The invitation has come rather in the form of a challenge from the German navy, which has a well-known American naval officer. He had behind him a very influential committee of American naval and air authorities who are prepared to undertake the organization, and are making plans for a special craft to be built for the United States.

It is intended that the event shall be an international one. The Air Ministries of Great Britain, France, Italy, Spain, Portugal, Belgium, Norway, Sweden, Denmark, Cuba, Mexico, Brazil, the Argentine Republic, Chile, Peru, Japan and China have all been communicated with in order to secure their official support for the project and to induce them to enter craft. There will be no limit placed upon the size of the machines, but they must be designed as passenger-carrying craft.

The full details of the race are to be settled by an international committee of experts from each of the countries which decide to participate. Whether Great Britain shall take up the challenge is now being considered by representatives of the aircraft industry in this country.

Soldier Settlement

A total of 2,400 returned soldiers have been settled on lands in Southern Alberta by the Calgary branch of the Soldier Settlement Board and an average of 25 soldier-farmers placed on lands still being maintained by the Calgary district alone amount to nearly 15,000,000.

Affection

He—Darling, you remind me of my bank account.

She—(frowning up to him)—Why?

He—Because you think so much of me.

He—No; because you are so small.

—Detroit Free Press.

War Neurosis Defined

The Term, "Shell Shock" is Said to be Incorrect

If Great Britain should have the misfortune to be engaged in another big war, it is safe to predict that no word of "shell shock" will appear among the list of casualties. The first recommendation of the War Office Committee on "shell shock" was that the term should be published, so that the term should be out of the official language.

"War Neurosis" is considered to be the best general term. "Shell shock" is declared to be wholly misleading, because it occurred to patients who had never been in actual hearing of a shell burst. "It is no surprise to find that the general lay conception of the term was very loose and ill-informed," the committee states. "There was such anxious solicitude during the war as to the inexperienced, and such was the appeal of the term 'shell shock' that this class of case excited more general interest and sympathy than any other, so that it became a most desirable complaint from which to suffer."

"No case of psycho-neurosis, or of mental breakdown, even when attributed to a shell explosion, should be classified as a battle casualty any more than sickness or disease. "In many cases," says the committee, "it is extremely difficult to distinguish cowardice from neurosis, since in both fear is the chief causal factor."

Cdr. Stubbis, D.S.O., expressed the opinion that efforts should be made to get rid of the idea, especially prevalent among young soldiers, that it was disgraceful to feel scared when in action.

"It is not known, but I think it is an awful rank the whole time," he told the committee, "and I think most persons were. If the young soldier were given to understand that everybody is a coward, and that it is a natural condition to be in, but he should overcome it, and if he were told also about the effect of fear on the mind, he would be able to control himself. I think it would have some effect."

Motor Tourists at Calgary

Visitors From All Over United States Are Reported

Six hundred visitors slept at the motor camp on St. Patrick's Island, Calgary, during the month of July. They were from all parts of the American continent and expressed the greatest satisfaction with the accommodation provided.

Touring motorists included many representatives of the States of Idaho, New Mexico, Nebraska, Washington, Oregon, Texas, New York, Michigan, Alabama, Wyoming, Ohio, Utah, Illinois, Pennsylvania, and New Mexico.

Mammoth Under Niagara's Sands

We are told by ecologists that 150,000 years ago a great sand sheet which covered huge animals whose teeth were three feet long and more than twice inches thick. Such a tooth was drawn out of the sand at Niagara Falls by a dredger, and now efforts are being made to find the owner of the skeleton of a mammoth lies in the sand—how far down it is impossible to guess. They think, however, that probably the sand is not very deep down, and that the dredger broke the skull when it fished the tooth up.

Says Germans Must Pay

Plain Speech Delivered by M. Poincare on Subject of Reparations

"War is always a calamity for people," said M. Poincare, "but before Germany hurried herself upon in 1914 humanity had tried to make certain laws for international justice which would render them less murderous. Conferences prescribed certain means of destruction, forbade suicide crimes, and imposed on belligerents certain laws of humanity."

"Imperial Germany refused to submit to these rules. During all the war her armies refused to recognize the laws of humanity. Inhuman treatment of civilian populations, assassinations, pillage, burning, bombardment of open towns, asphyxiating gas—all were invented to obtain by terror the victory they could not gain on the honorable field of battle."

"It is not enough that today after they have been beaten, some Germans profess to condemn these practices. When they were being carried out by the Germans encouraged them, all Germans who had the chance to do so in the sack of villages or of provinces in the north. All assumed responsibility for the damage which was done. The equally bound not to do the harm done to us. And we must make them pay."

It was further pointed out that the general lay conception of the term was very loose and ill-informed, the committee states. "There was such anxious solicitude during the war as to the inexperienced, and such was the appeal of the term 'shell shock' that this class of case excited more general interest and sympathy than any other, so that it became a most desirable complaint from which to suffer."

"No case of psycho-neurosis, or of mental breakdown, even when attributed to a shell explosion, should be classified as a battle casualty any more than sickness or disease. Mammoth Under Niagara's Sands

We are told by ecologists that 150,000 years ago a great sand sheet which covered huge animals whose teeth were three feet long and more than twice inches thick. Such a tooth was drawn out of the sand at Niagara Falls by a dredger, and now efforts are being made to find the owner of the skeleton of a mammoth lies in the sand—how far down it is impossible to guess. They think, however, that probably the sand is not very deep down, and that the dredger broke the skull when it fished the tooth up.

Extracts Lamerton M.D. 398
Minutes.

The council of the Municipal District of Lamerton, No. 398, met at the municipal office in Alis, on Saturday, September 9th, 1922, at 2 p.m.

All the members of the council were present with Reeve J. E. Merrifield in the chair.

The minutes of the council meeting held August 12th, 1922, were read and were confirmed on a motion by Mr. Tallman.

The following were appointed fire guardians:
Division No. 1, R. W. Barritt, Mirror; Division No. 4, W. King, Clive.

Replying to a letter from Inspector E. Ainsworth of the public works department, Red Deer, the following bridges were slated for repairs next season:

Division No. 1, Haunted Lake bridge;
Division No. 2, bridge between 4 and 5-39-23-4, (at Larkin's);
Division No. 3, re-novel of bridge on range line between ranges 24 and 25.

Division No. 4, between section 31-40-21-4 and section 6-41-24-4.

Division No. 6, bridge between sections 33 and 31-40-22-4 (Lamerton).

On a motion by Mr. Foret, permission was granted E. P. Bennett, Clive, to fence road allowance immediately north of the N. E. 22-41-24-4.

An application from the H. B. MacDonald Company, Ltd., Calgary, for exemption from Wild Lands Taxes on N. E. 18-40-22-4 was granted on a motion by Mr. Jewell.

A delegation from the council of the village of Alis, consisting of Reeve J. R. Mackie, Councillor P. Foster and Secretary-treasurer H. G. Finch, waited on the council with the view of arriving at an agreement in the case of J. S. Smith, for whom the council at the previous meeting had refused responsibility.

After a lengthy deliberation lasting nearly an hour, and as it was found impossible for the two councils to come to an agreement, Mr. Jewell moved that the secretary-treasurer of the two councils, together with one councillor from each council proceed to Edmonton and lay the case before the department, also that J. H. Lamb, deputy minister, department of municipal affairs, be accepted as arbitrator. Carried.

This arrangement, the representatives of the village of Alis agreed to, and the secretary was instructed to make the necessary arrangements.

On a motion by Mr. Jewell, Reeve Merrifield, was appointed to represent the council at the interview with the department, he having investigated the case together with the secretary.

The secretary was instructed to write the department to ascertain how to obtain a municipal pound brand.

J. M. Fresh, Clive, tendered his resignation as pound keeper for Division No. 3. The resignation was accepted.

Cheque No. 1001, dated October 13th, 1921, for \$5.50, favour Geo. Hartle, Clive, was reported lost, and the secretary was instructed to issue a new cheque.

Mr. Tallman requested that a letter be written the department of public works, asking for the cancellation of the old survey of the south side of S. E. 1-40-23-4; also at the corner of S. N. 3-40-21-4 the latter also touching section 33.

On a motion by Mr. McMillan permission was granted Mr. Foret to let the contract for the grading of the road west of

sections 30 and 31-40-21-4, one mile in length.

The reeve requested, that mention be made in the minutes that the balances to the credit or otherwise of the various divisions were, according to the estimates, reckoned out as per September 9th, 1922, and could be seen.

Accounts amounting to roughly \$1,000.00 were passed for payment on a motion by E. C. Sherburne.

Mr. Foret moved the adjournment of the meeting, at 6.30 p.m. GEO. HERRICHES, Secretary-treasurer.

New Officers Elected

A meeting to re-organize the Trail Rangers was held in the Union Church on Friday, Sept. 8th. It was decided to pay 5c per week as dues.

An election of officers was held, the following being elected:

Hugh Smith, Chief Ranger;
Jack Annesley, Sub-Chief Ranger;

Arthur Ballantyne, Tally;
George Oldring, Cashier;
James Oldring, Doorkeeper.

A committee was appointed to draw up a program for two months, viz. Hugh Smith, Norman Ray, Jack Annesley and Arthur Ballantyne. Meeting adjourned. ARTHUR BALLANTYNE, Tally.

Tenth Fortnightly Report

Issued by Publicity Commissioner, Department of Agriculture, Edmonton, Sept. 11, 1922.

The cutting of wheat has been finished in Alberta and threshing is under way in a number of districts, but will not be general for about a week. Oats have been harvested to the extent of about 50%. Rye threshing is practically complete. This crop has not yielded quite as heavy as was anticipated at the time of cutting.

The weather since the last report was issued has been cool and showery with light frosts in some districts but not sufficiently heavy to damage the grain. The rain has considerably delayed the ripening of oats but has materially helped green feed and pastures. In many parts of the centre and north where feed prospects were poor a month ago, sufficient feed is now available. The fall pastures are in such condition that the stock generally will go into the winter in good shape.

A large number of trench silos have been constructed. The filling of these is now in progress in all parts of the province. Sunflowers and corn will give heavy yields and will provide a large amount of winter feed. The second cutting of alfalfa in the irrigated districts is almost complete. An inspection of this crop by department

IS IT A
?

OF WHERE TO GO

...THAT KEEPS YOU FROM
TAKING A HOLIDAY TRIP

Then let us help you to solve it by suggesting

"THE NATIONAL WAY"

TO

Pacific Coast

Eastern Canada

CANADIAN NATIONAL offers a diverse route to the Pacific Coast, going rail and steamships, returning all rail, or vice versa, thus giving passengers the advantage of delightful boat trip as well as travelling over entirely different territory in each direction. The Northern Canadian Rockies, traversed by the Canadian National, afford the finest mountain scenery to be found on this continent, and so vast that it is always new. To make your trip complete a few days should be spent at Jasper Park Lodge.

There is nothing that will contribute so much to the enjoyment of your trip or holiday as travelling Canadian National to Port Arthur or Duluth, thence steamers of the Northern Navigation. In connection with this summer trip east, there is the option of returning by a cool alair route—the Canadian National route—a comfort given route and comfort given train. East by boat, West by rail, or vice versa, or all rail in both directions.

SPECIAL SUMMER FARES NOW IN EFFECT

Through Daily Transcontinental Service

FASTEST TIME - SHORT LINE - SUPERIOR ROADBED - EXCELLENT SERVICE

THE "CONTINENTAL LIMITED" operates daily in either direction between Montreal and Toronto, Chicago, Winnipeg and Pacific Coast points, and comprises All-Steel Compartment-Observation-Library Car, Standard and Tourist Sleeping and Dining cars, Colonial cars and coaches.

The "NATIONAL" operates daily between Winnipeg, Port Arthur and Toronto, carrying modern and up-to-date equipment.

THERE IS A WIDE CHOICE OF ROUTING AND STOP-OVER PRIVILEGES, ENABLING YOU TO COVER NEW GROUND IN BOTH DIRECTIONS

Any Agent will assist you with your trip. Route Fares, make Reservations and look after all details
